

## *Property Risk-Assessment is an Investment in Better Business*

When **AESC** was engaged by a large national organisation in the education industry to partner with them in actively identifying, managing and reducing their property risks across their portfolio, we took on a commitment to inspect multiple individual sites across several states.

The first steps for our **AESC** risk team was to carry out initial assessments, with regular follow-up assessments every six months.

The result was a positive investment for our **AESC** client because, having worked closely with the property department and onsite Facilities Managers to manage their identified risks over a 3-year period, our team's findings led directly to a 75% reduction of their open hazards and flowed on to the successful rectification of all identified 'Acute' and 'High' risk hazards.

Our attention to detail and quality customer care was made possible with our unique risk-management platform, **BOSS**, which was utilised across the entire portfolio - enabling the client to actively view, manage and track both current and completed hazards for their risk-governance requirements and peace of mind.

Through the engagement of **AESC** as a professional risk-management partner, our client is now comfortable they are providing a safe environment and facilities for their staff, contractors, volunteers and visitors.

It's further proof that property risk-assessment is a worthwhile investment for any business seeking the security and safety of adhering to complete compliance - something that enables them to focus on what they do best, while they leave looking after their risk-management needs to the qualified professionals from our specialist **AESC** team.
